MADL (Maryanne) with Zachariah
October 22, 1984

Session 10: Free Flow

Summary: Explorer is guided by Zachariah to a spiral of stars. Zach stays behind while she enters a tunnel traveling through “worlds upon worlds”. The tunnel is a field through which you pass from one universe to the other. The gravitational pull is intense.

We are embarking on a mission to the other realm of God – to our homeland. For the Explorer, this is experienced as a ribbon of light flowing out from a point and streaming through her field. The streams of light are braided together reminding her she has never been severed from her homeland. We are more than we remember.

As the explorer continues her journey she feels a step up in vibratory frequency and is at such a high level that when the moderator is trying to bring her back she starts to panic that her energy won’t fit back into her body. She makes it back OK but takes awhile to adjust.
